

## **WELLBORE ENERGY SOLUTIONS ACQUIRES JACKAL SERVICES**

**LAFAYETTE (April 27)** – Wellbore Energy Solutions, Inc. has acquired Jackal Services, LLC. Wellbore is a leading provider of proprietary downhole cleanout tools in the Gulf of Mexico region and is expanding into international markets.

At the time of the acquisition, Jackal Services changed its name to Environmental Drilling Solutions, LLC (EDS) to better reflect EDS's zero discharge rig containment systems which reduce the environmental impact associated with oil-based drilling fluids, including direct drive vacuum systems and state-of-the-art cuttings handling/processing equipment and services.

"This is a great opportunity for us to diversify our service portfolio," said Kirby Arceneaux, Wellbore Energy Solutions chief executive officer. "Like Wellbore, Environmental Drilling Solutions is comprised of an experienced management team of specialists dedicated to applying innovative rig site solutions for clients."

The founders of Jackal, Chad Hollier and Joey Templet, will remain as shareholders and as an integral part of the EDS management and marketing team.

As part of the acquisition, Wellbore partnered with existing investor NGP Energy Technology Partners. "The EDS acquisition is an excellent fit with Wellbore and it expands upon our strategy to develop a diversified service business around a team we strongly support," said Michael LeBourgeois with NGP Energy Technology Partners.
